PROFILE

HND Computer Science graduate with practical experience building responsive websites and supporting financial data workflows. During an NYSC placement at an accounting firm, reviewed bank statement information, organized records in Excel and assisted with everyday technical tasks. Interested in web development, data operations and useful digital tools.

EXPERIENCE

Perez Acume Professional Service Ltd | NYSC placement, September 2025 - 2026

- Supported bank statement review and organized transaction information for further analysis.
- Used Microsoft Excel to structure data, maintain records and assist with routine financial information review.
- Helped with document handling, data entry and general computer support for the team.

SELECTED PROJECTS

One Voice Rental & Decoration | Responsive website

Built an event services website with decoration and rental pages, project photography and enquiry paths for mobile and desktop. HTML, CSS and JavaScript.

StatementFlow | Prototype

Explored a workflow for bringing bank statements from different formats into a more consistent review and classification process. Prototype concept, not a production system.

Operations dashboard | Interface concept

Designed a concept view of bookings, upcoming work and key figures with a focus on readable information hierarchy.

EDUCATION

Federal Polytechnic Bida | Higher National Diploma, Computer Science

National Diploma, Computer Science | NYSC service year completed in 2026
